$c_1 = \{5, 12, 8, 18\}$ $c_2 = \{3, 9, 11, 17\}$ $c_3 = \{1, 4, 19, 20\}$

t = 1: get c_1 so $D = \{5, 8, 12, 18\}$ L = 5, R = 18

expand L and R: L = 3, R = 19 by bootstrapping

t = 2: get c_2 so $D = \{3, 9, 11, 17\}$ L = 3, R = 19

expand L only: L = 3, R = 19

$3 \leq 3, 9, 11, 17 \leq 19$ no bootstrapping

t = 3: get c_3 so $D = \{1, 4, 19, 20\}$ L = 3, R = 19

min(D) = 1 < L: expand L = 1

max(D) = 20 > R: expand R = 20

L is minimum. Bootstrapping R = 21
